### NEXT GENERATION DIGITAL RADIO

# EMPOWER YOUR OPERATION

Leading the PMR industry, Hytera possesses comprehensive capabilities of software and hardware development and continually evolves for more than 20 years to provide solutions to tens of thousands of PMR users worldwide.

Hytera now presents the next generation of professional digital mobile radio, the flexible and scalable HM788Uv. The HM788Uv supports a standard single control head and remote control head (Single or dual) to suit different environments such as vehicles, motorcycles and fixed control rooms, ensuring efficient communication. Moreover, it provides various connections, through which rich applications can be integrated into existing services to improve work efficiency.

The HM788Uv adopts a new appearance while maintaining high quality. The new UI interaction facilitates faster operation. The AI-based noise cancellation technology guarantees clearer voice in noisy environments.

## ENHANCED DESIGN

2.4-inch screen,  
simple UI interaction  
assists in operating quickly

Standard 1DIN size

Faster cooling with all-aluminum  
case design

Accessory Port

Ethernet Port

Built-in BT 5.0, allows wireless accessory  
adaptation and data transmission.

Built-in speaker assures clear and loud voice  
even without an external speaker

# PRODUCT HIGHLIGHTS

## MORE FLEXIBLE INSTALLATION

With the flexible control heads and accessories, the HM788 Uv can be installed in various environments to satisfy different use requirements. The connection cable of the remote control head can be either 3m, 10m or 40m as standard. A connection cable of up to 120m is also available (Customisation required).

Form	 Standard control head	 Remote control head (Single or dual) Connection cable (3m, 10m, or 40m)	 Fixed station
Application	Small vehicles, motorcycles	Ambulance, fire engine, truck, large bus	desktop office

## AI-BASED NOISE CANCELLATION FOR CLEARER AUDIO

The HM788 Uv adopts AI noise cancellation technology to filter out background noise (such as road noise), eliminate echoes, extract human voices from noise, and reduce howling and exhalation sounds at close proximity. With this technology, the mobile radio provides crisper and clearer audio for the other party.

The advantages of AI noise cancellation are as follows.

- **Clearer**  
Extremely high noise cancellation on steady and unsteady noise, up to 30dB  
Can reduce howling outside 30cm
- **Faster**  
Accurately extract human voices from noise in milliseconds or even without delay
- **Flexible**  
With deep learning ability, suitable for more noise  
10-level adjustable noise reduce level

## MAIN FEATURES

### Operating Modes

- Conventional(digital/analog)
- Digital trunking

### Text Message

- Private message
- Group message
- Quick text

### Solution

- IP Transit
- Back to back
- Wireless link
- Clarity Transmission

### Voice Service

- Private call
- Group call
- All call

### Security

- Emergency alarm
- Lone worker
- Authentication
- Over the air encryption
- E2EE
  - Basic encryption
  - Full encryption
  - Hardware encryption

### GPIO Pins

- Public Address
- Horn & Lights
- Voice notify
- Ignition sense

### Supplementary

- Alert call(conventional)
- Remote monitor
- Enable/Disable
- Radio check

### Analog Mode

- 2-Tone signaling
- HDC1200

## RICH SCALABLE APPLICATION

HM788 Uv supports multiple connections through BT, and the accessory and network (Ethernet) ports. It also supports Clarity Transmission and back to back connections which will greatly facilitate your solutions. Examples include:

- Allow for collection of data from equipment (Wired or BT) and facilitate transmission of this data to the background platforms using either the IP or radio network.
- The coverage in conventional digital mode can be extended by IP Transit.
- Cross-band or cross-system communication can be achieved through Back-to-Back or IP Transit.
- For situations where repeaters cannot be connected via IP or the cost of doing so is too high, the repeaters can be connected via cable to MD78X to create a wireless link between regions. This could be useful in industries such as oil extraction where offshore oil rigs are used.

## Application Solution

### Clarity Transmission

The data Clarity Transmission feature provides a transparent channel for data transmission without any change. As a part of the data acquisition and monitoring control system, the HM788 Uv provides customers with solutions for monitoring and controlling industrial production processes.

### IP Transit Solution

With the Ethernet network interface of HM788 Uv, IP Transit offers an economical and simple networking solution that complements the existing two-way radio system. This solution works in direct mode operation (DMO) and expands the communication range of the radios through the IP network. It can effectively solve the communication problems across regions, complex terrains, or in buildings where signals are difficult to penetrate. This solution greatly saves on cost due to only requiring one frequency and it removes the need for additional infrastructure and complex configuration.

The IP Transit solution supports the following services:

- All voice calls (including calls with acknowledgement)
- All data services
- All signaling
